

DigitalMarketingMentor

Web Foundations Series

Network Technology Associate

Course Topics

This course will undertake learning in the following areas...

- Introduction to Networking
- Networking Components and Standards
- Connecting to the Internet
- Internet Services
- Hardware and Device Connectivity
- Network and Cloud Security Risks

Target Audience

All students and professionals preparing to enter or continue in the workforce can benefit from the CIW Network Technology Associate course and/or certification

Prerequisites

No prior experience using the Internet, developing Web pages, or configuring networks is necessary. Students should be familiar with an operating system such as Microsoft Windows 7 before taking this course. The CIW Web Foundations courseware does not provide entry-level computer literacy. Rather, it builds upon computer literacy training and certifications such as Microsoft Office Specialist

Online Resources Provided!

All CIW courses offer Case Studies for class discussion about real-world skills applications and job-related topics. Guided, step-by-step labs provide opportunities to practice new skills. Students can challenge themselves and review their skills after each lesson in the Lesson Summary and Lesson Review sections.

Additional skill reinforcement is provided in Activities, Optional Labs, Lesson Quizzes and a Course Assessment that are available from the teacher.
